

Use Case Scenarios

ATTO ExpressSAS 6Gb/s SAS/SATA Host Adapters

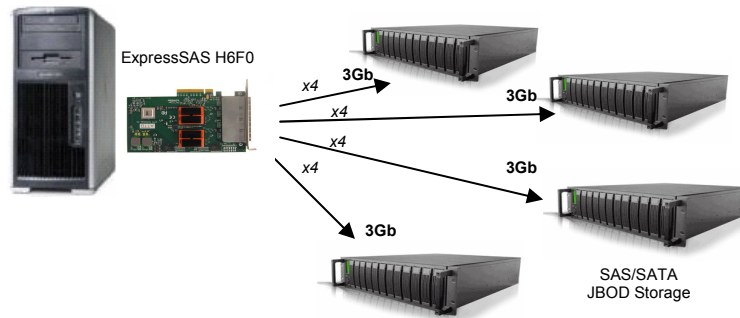

Use Case A: ExpressSAS H680 8-Port HBA connected to 3Gb/s SAS/SATA Storage

Performance improvements (up to 36% for SATA and 21% for SAS) can be achieved simply by using an ExpressSAS 6Gb/s HBA to connect to 3Gb/s SAS/SATA storage for high-bandwidth IT and digital media applications.

Use Case B: ExpressSAS H6F0 16-port HBA attached to multiple 3Gb/s SAS/SATA JBOD storage arrays

A robust storage configuration with multiple 3Gb/s SAS/SATA JBOD storage. With two independent controllers and 16 independent ports the H6F0 provides up to 60% greater performance and a future proof connectivity option.

Use Case C: ExpressSAS H60F 16-Port HBA attached to internal SAS/SATA drives

The H60F's 16 independent ports provide connectivity for up to 16 SAS/SATA internal drives in a 2U or larger rackmount storage enclosure, eliminating the need for a SAS expander.
